Constituents and additives	Effect on the potting soil
Coir pith	improves on a natural way the air capacity and the water flow in the potting soil
Xylite	stabilizes the structure of the potting soil and provides for good root growth by natural humic acids
Perlite	provides for a high porosity and a high air capacity
Quality controlled green compost	contributes to the nutrient supply of the plants, stimulates the soil and provides for an optimal water uptake
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Flora Veggie-Mix (natural fertilizer)	Vegan fertilizer consisting of plant-based-organic and mineral materials. For a natural nutrient supply

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. The raw materials and additives that are used for the product conform to the regulation (EG) No. 834/2007 regarding the ecological/organic production with its regulation (EG) No. 889/2008 for the implementation.
