Chemical characteristics (at the moment of production)

pH-value (CaCl ₂)	5,6
Salt content (g/l)	1,3
N-nitrogen (CaCl ₂)	190 mg/l
P ₂ O ₅ -phosphate (CAL)	220 mg/l
K ₂ O-potassium (CAL)	630 mg/l

Recipe:

117969

Hint for availability of nutrients:
The nutrients are sufficient for a period of up to six months

- Peat free
Organic
Peat reduced

Constituents and additives

Effect on the potting soil

Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Strongly decomposed raised-bog peat (black peat)	increases the water holding capacity and improves the water uptake
Quality controlled green compost	contributes to the nutrient supply of the plants, stimulates the soil and provides for an optimal water uptake
Organic wood fibres	loosen and aerate the potting soil and promote rooting of the plants
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Top-Quality compound fertilizer	supplies the plants immediately with all macro and micro-nutrients
Micro-nutrient fertilizer Floraspur	supplies the plants additionally with micro nutrients
Coated slow release fertilizer	supplies the plants with all long-acting macro- and micro- nutrients
Wetting agent Aqua-Plus	improves the water uptake of the potting soil particularly of the dry material

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
