Chemical characteristics (at the moment of production)

pH-value (CaCl ₂)	3,2
Salt content (g/l)	< 0,3 g/l
N-nitrogen (CaCl ₂)	< 50 mg/l
P ₂ O ₅ -phosphate (CAL)	< 50 mg/l
K ₂ O-potassium (CAL)	< 50 mg/l

Recipe:

111722

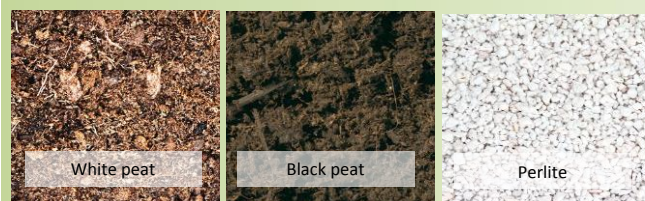

- Peat free
- Organic
- Peat reduced

Constituents and additives

Effect on the potting soil

Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Strongly decomposed raised-bog peat (black peat)	increases the water holding capacity and improves the water uptake
Perlite	provides for a high porosity and a high air capacity
Wetting agent Aqua-Plus	improves the water uptake of the potting soil particularly of the dry material

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
