Chemical characteristics (at the moment of production)

pH-value (CaCl ₂)	6,0
Salt content (g/l)	1,9
N-nitrogen (CaCl ₂)	220 mg/l
P ₂ O ₅ -phosphate (CAL)	150 mg/l
K ₂ O-potassium (CAL)	850 mg/l

Recipe:

120548

- Peat free
- Organic
- Peat reduced

Constituents and additives

Effect on the potting soil

Coir pith	improves on a natural way the air capacity and the water flow in the potting soil
Organic wood fibres	loosen and aerate the potting soil and promote rooting of the plants
Xylite	stabilizes the structure of the potting soil and provides for good root growth by natural humic acids
Quality controlled green compost	contributes to the nutrient supply of the plants, stimulates the soil and provides for an optimal water uptake
Pumice	increases the structural capacity of the potting soil for a long time and provides for an optimal air and water flow
Bentonite of high sorption capacity	the fine granulation provides for an optimal distribution of the clay. Its high buffer capacity counteracts fluctuations of salinity and pH-value
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Flora Bio-Mix (natural fertilizer)	supplies the plants with natural and immediately available nutrients and stimulates the soil activity

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. The raw materials and additives that are used for the product conform to the regulation (EG) No. 834/2007 regarding the ecological/organic production with its regulation (EG) No. 889/2008 for the implementation. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
